

# Chapter XIV: It Exists, but It's Not There

**Herobrine:** Alright man, if this doesn't work we're gonna have to go to plan Z. Satisfy the monster.

**The INFECTER:** God save us. Here we go. Adding Element G22 in 3, 2, 1...

*Poof... nothing.*

**The INFECTER:** Shoot!

**Herobrine:** Alright.

**The INFECTER:** No no no, I think I'll be able to critique it to where-

**Herobrine:** Hey! Last chance, but it doesn't work this time, we're going to have to satisfy it.

...

**Alex:** Where was the last place you remember it being?

**Guardian Sun:** It's somewhere here, just keep looking.

**Sam:** I can't believe you misplace an object that can defy all laws of science in a drawer.

**Guardian Sun:** Being all honest... it's more likely in the refrigerator.

...

**Steve:** Um-

**Guardian Sun:** Ah, there it is.

**Alex:** Where is it?

**Guardian Sun:** Right here.

**Steve:** Okay I've seen this game before.

**Guardian Sun:** No no, this is the Impossible Element.

**Sam:** But, it's not- there's nothing there.

**Guardian Sun:** It's invisible.

*Sam tries knocking on it, but nothing.*

**Sam:** I think it's only invisible if you actually know that it's there!

**Guardian Sun:** The Impossible defies all laws of science, so regarding your 5 senses, whatever you think you can sense from this, you can't.

**Alex:** Excuse me?

**Guardian Sun:** It has no odors or flavors, it absorbs any and all sound energy, it's invisible, it doesn't have a definite shape or volume, but it is a solid, and it's foundational units have zero kinetic energy between them. Thus, it couldn't be, shouldn't be, however, it is.

**Steve:** It is what?

**Guardian Sun:** Impossible.

**Sam:** ...So what exactly does it do when you put it into that processor?

**Guardian Sun:** Well if you haven't noticed the control panel full of yellow buttons, you'll see.

...

**Alex:** Disable acceleration??

**Steve:** Enable bacterial POV??

**Alex:** Alter subject and all contents to liquid form??

**Sam:** Light speed times 15???

**Steve:** Antimatter shield??

**Alex:** What is this stuff??

**Guardian Sun:** This stuff is what Nibiru is hunting us for. If Nibiru takes the ship and element, then all hope is lost for virtually the entire quadrant of the galaxy.

**Steve:** How do you know that Nibiru wants it?

**Guardian Sun:** If you had the ability to shrink to subatomic size, travel 25 times the speed of light, or never have to waste time accelerating ever again, wouldn't you want it.

**Steve:** Well I don't know.

**Guardian Sun:** Roughly translated this element is about 900 quadrillion times more valuable than 5 pounds of raw diamond.

**Steve:** I guess I might want to go for it.

**Guardian Sun:** We are not using this thing now, though it produces infinite energy, it's not going to be helpful until Nibiru arrives. You guys need to think of a plan.

**Alex:** We have to think of a plan?

**Guardian Sun:** I only know what the Totem of Z gives me, your uncle doesn't want you to find out about something, and you need to figure it out before you wake up.

**Steve:** Yeah, now we're back to waking up.

**Guardian Sun:** I know it's frustrating, but you need to learn what your uncle is afraid of you learning and wake up as soon as you can!

**Sam:** Maybe we should backtrack some more, what was the very first thing that Guardian Moon told you to do?

**Alex:** Uh, come together, continue the bloodline, and defeat your uncle, but first, you have to wake up.

**Sam:** ...First you have to wake up?

**Steve:** What?

**Sam:** But you continued the bloodline before you woke up. Why would that be?

...

**Alex:** You were sent by... something. ...Sun, did a creature with an echoey voice ever come and tell you anything about our situation?

**Guardian Sun:** As a matter of fact, yes.

...

**The INFECTER:** Alright, adding Element G22 in 3, 2, 1.

*Sssss.*

**Herobrine:** I don't think it worked.

**The INFECTER:** \*Sigh\* I can't beli- AHHHH.

*The 3 of them began to tremble in distress, holding their ears, as if they heard a loud ringing.*

**Herobrine:** What the heck did you do??

**The INFECTER:** I think it's a frequency emission!! Maybe the subject can't handle frequencies of that intensity.

**Herobrine:** What kind of potion emits a sound frequency???

*It began to quiet down.*

**The INFECTER:** That was far above 20,000 hertz, though I wonder, if we were in pain, or if the subject was in pain.

**White Entity:** You think we could burn it out of us?

**The INFECTER:** Well, not burn, but possibly, we could weaken it enough to where it gets too weary to stay in the vicinity.

**White Entity:** You really think that's possible?

**The INFECTER:** We've got to try, but we only have 2 allotments left of Element G22, if we run out, then we've really hit bedrock-bottom.

...

**Steve:** So the- what was his name?

**Guardian Sun:** God of Existence.

**Steve:** Right, God told you and all 10 of the others to praise us with a Theory of Everything?

**Guardian Sun:** Not particularly the theory that scientists resonate with, the Theory of Everything is actually discreetly linked to the Totem of Z, and if a Totem victim happens to achieve it, they will learn the destiny of every being that has involved themselves in your capture by the wretched totem.

**Alex:** So if we achieve this Theory of Everything, then we will know exactly what Herobrine's destiny is and will know how to stop it!

**Guardian Sun:** Exactly.

**Steve:** That's what he doesn't want us to know! Wow he really is screwed!

**Alex:** He doesn't- ohh, if we can achieve it and wake up before Nibiru shows up, then we've won this war for good.

**Sam:** I can't believe it, what a strange turn of the tables.

**Steve:** Only one question, how do we achieve it?

...
